

# Organics & Regenerative Ag

Tools for climate action

**FarmFolk**  
**CityFolk** 

## **Our Vision**

Sustainable food systems where people and planet thrive.

## **Our Mission**

We connect, empower, and inspire people to strengthen BC's sustainable food systems.

## FARMERS FOR CLIMATE SOLUTIONS

- Increase cover cropping
- Less nitrogen fertilizer
- Rotational Grazing
- On farm-renewable energy
- Protecting wetlands & trees

When the world is on fire, we need all the expert help we can get to cool the planet.

Organic farmers are the well-trained agricultural “fire fighting brigade” in the face of climate change

## **The state of the climate emergency means:**

- **Everyone has a role**
- **We need to privilege existing, impactful practices and technology in order to make the changes necessary at the pace required**
- **No egos, no silos - we are all in this together**

☮ MAKE PEACE  
WITH THE WORLD  
DISARM   
REDUCE ENERGY  
RESPECT NATURE
